Release History

RELEASE	VERSION	DATE	AUTHORS	DESCRIPTION
Initial Draft	1	2025.04.28	RwC	Second quarter update

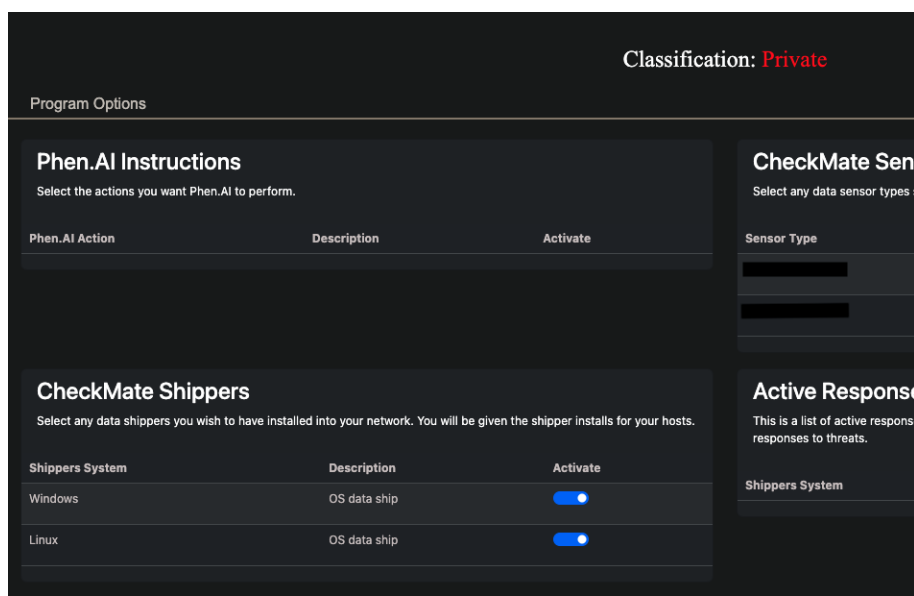

Classification: CCG Confidential

1. Download updates-9_25_4.zip from the provided url.
2. As admin user, move the zip file into /opt/update
 1. **mv updates-9_25_4.zip utilitynode:/opt/update**
3. **NOTE:** Make sure to download and run the **os_updates-9_25_4.zip** first
4. Change directory into /opt/update and execute the listed puppet script with the downloaded zip file as an argument
 1. **cd /opt/update**
 2. **sudo /opt/local/admin/pupdate.sh updates-9_25_4.zip**
5. Run **sudo puppet agent -t** on the utility node. Once that puppet run is clean, please run **sudo puppet agent -t** on the other nodes.

NOTE: Due to the kernel updates, there are to be expected errors during the puppet run on the computes, ingests and sensors. Reboots will be required by using the command **sudo shutdown -r now** when a kernel update is performed and then continue running puppet.

- To make sure the shippers are enabled, you'll go to the CheckMate web interface and login with your user, and under **Admin >> Options**, you'll click the button next to Windows and Linux checkmate shippers.
