CHAPTER 2: PRODUCT DESCRIPTION

2.1 Introduction

Canfield CyberDefense Group’s (CCG) CheckMate software solution satisfies the ATO and will provide a complete solution with an automated deployment process that is required to meet the customer’s analytic goals. CCG understands the mission is to provide a non-programmatic, non-scripted analytic platform that is not limited to a single optimized result. The CheckMate automation capabilities will engage in sophisticated analytic tasks that will simplify a personal analyst’s level of effort resulting in reduced cost and saving time.

The CheckMate system is installed and configured centrally located at the customer site. The system is an analytic cloud environment that scales to customer needs. All data is stored, processed, and displayed privately at the customer site. CheckMate allows for simultaneous processing and analysis by Phen-AI and analysts. The highest security and protection for the data are provided within CheckMate ensuring quality *Confidentiality, Integrity, and Availability* (CIA) and security protections.
